

AVEX Shell Scheme Information

The AVEX system is a modular shell scheme consisting of Velcro compatible grey tweed panels and aluminium profiles. 325mm deep royal blue fascia panels are provided on all open sides and are supported by aluminium uprights at the corners and along any fascia run over 4m in length. Stands over 4m in length may also require some additional support beams/ceiling grid which reduces the height inside the stand to 2430mm.

Enhancing your Shell Scheme Stand

Your Xhibit shell scheme stand can be enhanced with a range of optional features to create the perfect environment for displaying your products or services

From both flat and sloping shelves for displaying literature or products to adding lockable doors or curtain entrances to create storage, meeting or changing areas within your stand space.

Stands can be transformed to reflect your complete corporate identity by changing the colour of your wall panels or even integrating digitally printed panels from your own creative artwork.

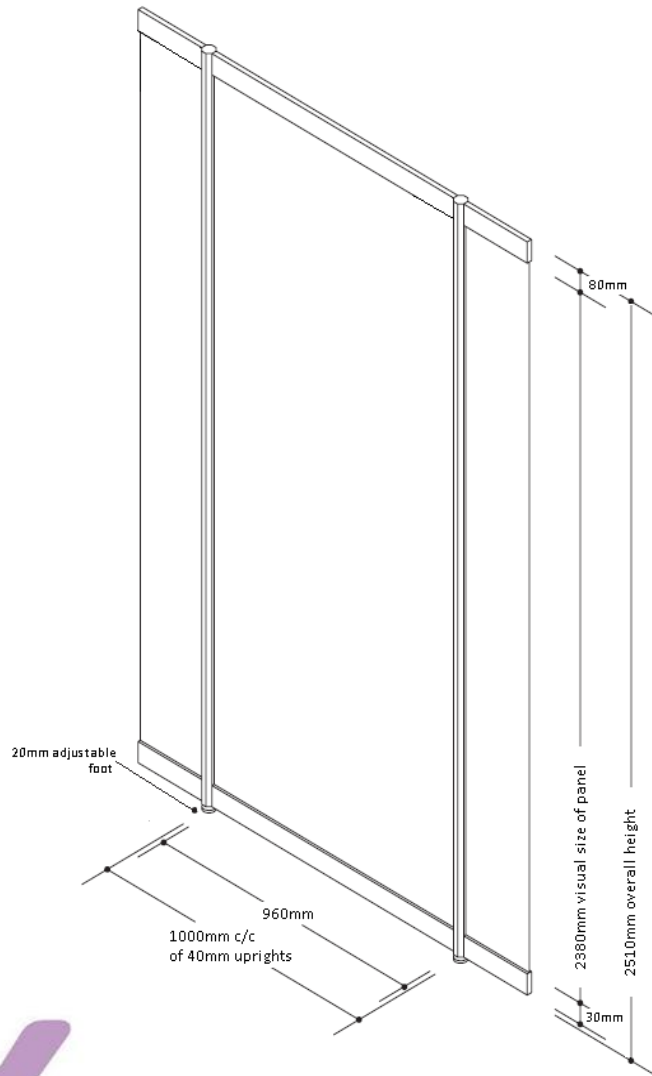

Decorating and Displaying Items on your stand

Please observe the do's and don'ts associated with this system. Posters and display material can be attached to the panels of your shell scheme using hook Velcro pads or strips. **Nothing should be attached to the aluminium profiles.**

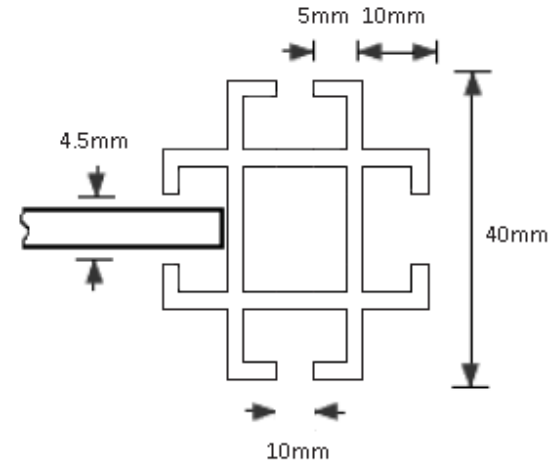

No Staples, Nails, Screws or Tape should be used when decorating your stand.

Any damage to the shell scheme system will result in a charge.

Panel Dimensions

Post Section Dimensions

The image shows the dimensions of a typical 1m wall section and the aluminium post section.

The maximum display area of each 1m wall section panel is 960mm x 2380mm. The AVEX post section protrudes by approx. 15mm between every panel.

Typical 3m x 2m stand layout
