## 10x10m Boehringer @ EHA Congress

Boehringer initially wanted to hire a modular stand due to a clash of exhibitions meaning they couldn't use their large custom build stand.

They were so impressed with this stand that they bought it, and have used it for a variety of stand sizes since, making great savings on the installation costs of their previous custom build.

## 6x4m Simplyhealth @ Employee Benefits

Simplyhealth have been using Linx since 2006 to fulfil their exhibition requirements. During this time they have changed their name from HSA to the present Simplyhealth. Having a modular stand with changeable graphic panels allowed for a very cost effective re-branding of their exhibitions.

With a stock of big bold graphics their stand always look fresh and attractive - the perfect medium for their strong corporate identity.

## 9x6m Morrisons

@ BCSC, Liverpool

Morrisons wanted a one-off high impact stand at the BCSC exhibition for retail property.

This 9x6m stand was designed to incorporate high level branding using seamless graphics large fabric graphics and a custom shaped bar. We sourced simple furniture for the open discussion areas, and an oak boardroom style table for the private meeting area.

Morrisons had a very successful show, and are already considering using a similar stand for 2013.

## 9x6m TIBA

@ Expo Carga, Mexico City

TIBA had never exhibited before, and came to us through a recommendation. We talked through their reasons for exhibiting and what they wanted to get out of this show, and worked with the organisers to bring some unusual features to a show in Mexico City.

This is the TIBA have now exhibited 3 times at this show, taking a larger stand space each time. This latest stand has 4m high backlit towers in each corner of the stand, creating little semi-private meeting areas in each corner of the stand, whilst maintaining an open aspect to the space.

## 8x5m DPAS

@ BDTA

### British Dental Trade Association

DPAS had been using a Linx stand since 2009; In 2012 they decided to try and utilise as much of their existing kit to achieve a more custom/ seamless look to their stand. The brief was met and the stand also configures into a 6m x 4m and 4m x 3m configuration to meet all the criteria for their annual events.
